

Pneumatic tubes without braid

Polyurethane tubes

Material	Polyurethane
Temperature range	-30°C ... +155°C
Dimensions (ID / OD)	4 / 6 mm 4 / 8 mm 8 / 10mm
Working pressure at 20°C	10 bar
Margin pressure at 20°C	25 bar
Packing	Coils of 100m
Colors	Transparent (standard). Other colors on request.
Usage	Polyurethane tubes without braiding are used for connecting different types of fittings. They are light and flexible, extremely resistant to oils and solvents of different types. Aging process is very slow what speaks of its longevity. Its life term depends on its application as well. They can be used in working conditions where the pressure may raise up to 10 bars. They can be used in a condition where the temperature is going from one extreme to the other without losing its amazing mechanical characteristics of high tensile and impact strength as well as high abrasion resistance.
